# What is the TD SYNnex Solution Factory?

Outcome-centric in nature and innovative at the core, TD SYNnex's Solutions Factory meets the rapidly evolving business needs of our partners. Our expert team aggregates solutions that bridge four key technologies – cloud, security, data and the Internet of Things (IoT) – and simplify them in a scalable way that empowers our partners to deliver value across the digital transformation landscape.

## Our Solutions Are...

### Outcome-Centric

We help address your organization's unique customer needs by building and delivering solutions that are tailored to specific outcomes.

### Innovative

We equip your organization with solutions that are agile, adaptable and resilient, helping you meet the evolving needs of customers.

### Streamlined

We simplify the complex deployment and implementation of cloud, hybrid and hyperconverged technology, mitigating risk, time and cost.

### Simplified

Automated, repeatable, and scalable, our solutions for next-gen technologies ease digital transformation initiatives.

## Digital Transformation is Easy With Click-to-Run™ Solutions

Our **Click-to-Run™ Solutions** reduce the deployment time of cloud-based solutions, like hybrid frameworks and other high-growth technologies, from days to minutes. This in turn, brings you results:

- **Increase Speed to Market:** Accomplish more, deliver faster, and compete in larger business segments – all without expanding employee count.
- **Mitigate Risks and Complexity:** Our team of experts takes care of the complex, so you can focus on growing your business.
- **Recognize Higher Profitability:** Optimize your resources, reduce costs and give your organization the tools to expand their portfolio.
- **Reduce the Skills Gap:** Little to no technical expertise is needed to configure or deploy our solutions, making training and onboarding a breeze.

Ready to learn more? This guide will show you our specialties in Cloud, Security, Data and IoT as well as resources to help you access to our top Click-to-Run™ Solutions for each sector.

# Click-to-Run™ Solutions for Cloud

Today, customers demand cloud solutions that help them solve their most complicated business problems and challenges – from document accessibility to data storage and beyond. **With global end-user spending on public cloud services expected to exceed \$480 billion<sup>1</sup> over the course of 2022**, organizations need to keep pace with solutions that can deploy and maintain cloud networks as fast as customers need them.

**TD SYNEX Click-to-Run™ Solutions for Cloud** are pre-configured to help remove complexity and increase your speed to market. They also ensure customers receive the custom results they need – faster and risk-free.

## Core Infrastructure

Every great cloud-enabled network starts with a steady foundation. Our Core Infrastructure Solutions can help you build on the pillars success. Offerings include:

- Archiving on Azure
- AWS ElastiCache for Redis
- Azure Active Directory Domain Services (AADDS)
- Azure Virtual Desktop (AVD) & Managed Azure Virtual Desktop
- FileSync on Azure
- RDS on Azure
- Scalable Storage With S3
- Small Business Cloud Server
- Virtual Machines With EC2
- AWS Storage Gateway

## Data Modernization

Our Data Modernization solutions help organizations keep pace with the ever-growing need for information. Offerings include:

- Ansible on Azure
- Azure SQL Database
- NoSQL with DynamoDB
- Redshift
- Relational Database Services (RDS) with AWS
- SQL on Azure (RHEL)
- SQL on Azure (Windows)

## Modern Workplace

Today's workforce demands more technology-based solutions to streamline processes and get the job done. This is where our Modern Workplace services come into play.

Offerings include:

- Identity Management
- Microsoft 365 with Domain Controller
- Modern Workplace With Secure Score
- NetApp SaaS Backup for O365
- Office 365 With ATP and Domain Controller
- Office 365 with AD Premium and Domain Controller
- Veeam Backup for O365

## Application Innovation and Data Management

When building and maintaining applications for a network become too much, our Application Innovation services are ready to step in. Offerings include:

- DevTest Lab
- Managed Containers on Azure
- Red Hat Openshift on Azure

# Click-to-Run™ Solutions for Security

The assault on the cybersecurity landscape is widespread and shows no signs of slowing down. Organizations, regardless of size, are negatively impacted by the aftermath of cybercrime.

**On average, these widespread data breaches are costing companies roughly \$4.24 million per incident.<sup>2</sup>**

To combat cyber threats, TD SYNnex supports the channel with **Click-to-Run™ Solutions for Security** – made to help security teams protect, detect and remediate systems.

## Data Protection

With more and more data destined to live online and on network servers, your customers can benefit from our Data Security services.

Offerings include:

- Cloud Backup on Azure
- File Storage With EFS
- File Sharing on Azure
- NetApp Cloud Sync
- NetApp Cloud Volumes ONTAP on Azure
- Site Recovery on Azure
- Veeam Backup for O365
- Veeam Cloud Connect on Azure
- Veritas Backup Exec on Azure

## Security Compliance

The first step to ensuring a secure infrastructure is having the right security protocols - and our Security Compliance solutions can help on this journey.

Offerings include:

- Azure Sentinel
- Veeam Backup and Replication (AWS)
- Veeam Backup and Replication (Azure)

# Click-to-Run™ Solutions for Data & IoT

In today's data-driven market, organizations face the challenge to collect, secure, augment, process and manage data effectively to gain a competitive advantage. With **more than 175 zettabytes of data in the world**,<sup>3</sup> there's more information and data points than organizations know what to do with.

TD SYNnex is positioned to help the channel innovate with our market-ready suite of **Click to Run™ Solutions for Data & IoT** – all able to collect and organize analytics and IoT technology to create game-changing outcomes.

## Data & IoT Foundations

To build a more connected, data-centric organization, customers need to have the right tools. Our Data & IoT Foundations services are a perfect way for them to get started.

Offerings include:

- Azure Data Lake
- IAconnects MobiusFlow® on Azure
- IoT Central
- IoT Essentials

## Data Modernization and Services

Using the latest data and insights is important in the modern workplace. Ensure customers can gain and maintain the best data to accelerate their analytics with our Data Modernization solutions and services. Offerings include:

- Azure SQL Database
- IBM Cloud Pak for Data on Azure
- Cloudera Data Platform (CDP) Private Cloud on Azure
